

Experience

Apple Summer 2022	As a human interface designer within the Human Interface Group, I supported Apple in building a new bicycle of the mind.
Meter Summer 2021	As a product designer, I designed multiple customer-facing and internal-facing products, which cut operation times by 10x. I also helped build Meter's design system, spanning near 100 components with 1000s of variants.
Dropbox Spring 2021	As a design strategist within New Frontiers (now called Organize The Cloud), I co-designed Dropbox's new multi-year product strategy, which is currently being implemented company-wide.
Apple Summer 2020	As a product design intern within Apple's Developer Technologies Group, I helped craft workflows to enable people to create apps without the need for code.
Postmates X Summer 2019	As a product design intern, I helped animate and program how Serve, Postmates' delivery robot, communicates with people around it. I collaborated with UX researchers to conduct user interviews and with engineers to port Serve's "expressions" to its hardware.
Talmor & Talmor & Talmor Summer 2018	As a brand design intern, I worked on branding projects for clientele in addition to spearheading social campaigns to grow the studio's social media following by 2x.
Thread Genius (acquired) Summer 2017	As a software engineering intern, I built a Swift library for Thread Genius' API. I also helped design the API's developer dashboard and automated Slack channels to streamline support workflows.
Aruliden Summer 2016	As a brand design intern, I contributed to projects for Google Jamboard, Hugo Boss, Proctor & Gamble, and Waterworks.
FutureProof Spring 2016	As a software engineering intern, I built an Apple Watch app that provided managers of cashier-less grocery stores with a live view of their customers' shopping activity.
Freelance 2015 – 2018	As a freelance designer, I built brands that attracted thousands of customers and created interfaces that have been used by thousands of people.

Education

Stanford University 2020 – 2024	As a junior, I'm majoring in History, researching the underlying drivers of economic development and technological progress.
The Dalton School 2006 – 2020	Attending Dalton from K-12, I led Dalton Community-Supported Agriculture, Sweet N' Low A Capella, and Varsity Squash.

Recognition

Apple 2017	Received a scholarship to Apple's Worldwide Developer Conference for my work in Swift.
Scholastic 2015	Received a National Gold Medal and Best in Grade Award for my photography of New York City.
